13 - 14 March, 2014 Linz, Austria

NILaustria

THE NILAUSTRIA INDUSTRIAL DAY

... the most essential industry driven event for the NIL community

In March 2013 the NILIndustrialday was hosted by PROFACTOR, the coordinator of the NILAustria project cluster, as the succeeding event of NaPaNil Industrialday for the first time. Since the NILAustria projects will present their results in March 2014, PROFACTOR takes the opportunity and hosts the NILIndustrialday 2014 again.

The international symposium will start on Thursday, 13 March after lunch-time. The lectures will finish on Friday, 14 March after lunch. The scientific part will be followed by networking activities (at Friday afternoon sight-seeing in Linz and at Saturday, 15 March skiing in the mountains south of Linz). Internationally recognized experts will discuss latest NIL related R&D results. Since NIL is leaving academics and becoming commercially relevant in manifold business areas, we are presenting both, the state of research and possible commercial use of NIL in

- optics,
- solid-state lighting,
- bit-patterned medias, and
- life sciences.

Judging on previous years, it is estimated that the conference will attract around 100 participants.

An important feature of the NILIndustrialday 2014 will be a small but powerful industrial exhibition of NIL equipment, tools, materials and software. The exhibition, which is situated next to the coffee breaks, will stimulate the dialogue between R&D and industrial people.

SPONSORSHIP – INVESTMENT OF € 1.000,- + VAT

- o Acknowledgement/logo on the NILIndustrialday 2014 website.
- o Acknowledgement in the conference flyer (PDF-file).
- o Acknowledgment at the conference opening and closing presentations.
