

# NILindustrialday 2014

## Workshop 4

### Nano Injection Molding

Friday March 14th

10:45-12:15, Gewölbesaal

| Presenter                | Organisation                                             | Title                                                                                    |
|--------------------------|----------------------------------------------------------|------------------------------------------------------------------------------------------|
| DI M. Rohn               | <a href="#">PROFACTOR</a>                                | Workshop introduction                                                                    |
| DI Martin Burgsteiner    | <a href="#">MUL</a><br><a href="#">Kunststofftechnik</a> | Processparameter and materials for nano injection molding                                |
| Prof. Magnus Kristiansen | <a href="#">INKA</a>                                     | Critical aspects and demands on mold construction                                        |
| Theodor Nielsen          | <a href="#">NILtechnology</a>                            |                                                                                          |
| Dr. Adrian Prinz         | <a href="#">Sony DADC</a><br><a href="#">BioScience</a>  | Challenges in production of $\mu$ -fluidic devices using injection molding               |
| Wolfgang Roth            | <a href="#">Wittmann</a><br><a href="#">Battenfeld</a>   | Nano injection molding from the point of view of a injection molding machine maufacturer |
